## Viewing Live Video

The first time you log on to the Local Control interface, it displays video in **Live Mode** .

Note: When you log in again, you return to the display mode that was open the last time you logged off.

In **Live Mode**, select a camera from the list on the left and drag and drop it into the viewing area on the right. If you have more than one video cell view displayed, you can drop it into any of the 4, 9, or 16 video cells.

Only the enabled cameras are displayed. If the recorder is connected to an ESM, then only the cameras for which you have access are displayed.

Note: For analog cameras, live video is displayed at the best possible frame rate/size/quality, regardless of what is configured in the Administrator Console.

Changing Views

Use the view buttons to choose the number of camera video cells that appear.

1 view   4 views   9 views   16 views

Next Steps

When you finish viewing live video, you can switch to **Search Mode** to locate video stored on the recorder's hard drives. See "Searching and Playing Archived Video" on page 2.

Quick Reference - Controls

Log On Controls

👤 🔒	Enter User Name, Enter Password. (Provided by your system administrator.)

Common Controls

|	
📹 🖥 ⏏	Change to Live Mode, change to Search Mode, log out.
Camera Name ▾	Change camera.
⛶	Resize video to fill the video display cell.
T	Enable or disable text overlay * on top of video.
Tᴛ	Click to change text size for text overlay.
☐ ⊞ ⊞ ⊞ ◩	Change the camera view layout. Hide the controls. (Click to display the controls again.)
⏮ ⏭	Move to start, move to end of video clip. Not available when the Start and End times for the video clip are blank.
🕐	Move to the current time, minus 30 seconds.
⏸ ▶	Pause video playback, play video.
◀◀ ▶▶	Scan video backward and forward (playback x2) in five second jumps.
●————	Shuttle control - scan forward and backward through video.
📷	Save a snapshot of the video.
{→ }→	Set the start and end time to the time and date of the displayed video.
{}ˣ	Clear the start and end times.
📥 📤	Add the video to the Clip Manager, play a video clip stored in the Clip Manager.
💾	Copy selected Clip Manager items to an external media device.
☐ 🗑 ⏹	Delete external media device contents before copying (check box), cancel copy.
☑ ER Evidence Reviewer	Include the Evidence Reviewer on the USB memory stick (check box).

* The enable/disable text overlay button is only available when the selected camera is configured as the primary camera for text capture (transaction or receipt data). For more information, see the *Administrator Console User Manual* or online help.

Local Control for the 8000 Series NVR
Quick Start Guide

This Quick Start Guide for the Local Control interface on the 8000 Series NVR provides the steps you need to view live video, to search for video stored on the recorder's hard drives, and to copy video to a USB memory stick.

The graphical user interface provides the following key features/benefits:

• Convenient local logon for live viewing and searching
• Control using USB mouse and monitor display
• Quick copying of evidence to an external media device connected to the recorder's USB port

If you have not yet connected a USB-compliant mouse and a monitor to the recorder, please see the *8000 Series NVR Local Control Addendum* PDF, which provides details specific to the 8000 Series, and supplements the *8000 Series NVR Installation Guide*.

Searching and Playing Archived Video

Click the **Search Mode** 🔲 button and select a camera using the camera selector.

📷 Camera Name ▼

The playback controls and the time and date of the current playback position are displayed below the video.
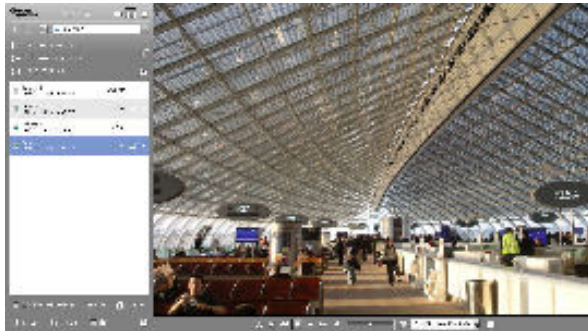

Find the video you want to view by changing the time and date displayed below the video. Select a value (for example, the day) and use the arrows to change that value.

🕐 2013-03-**18** 06:20:44 AM ▲▼

Use the playback controls to adjust the position.

🕐 ⏮ ⏪ ⏸ ▶ ⏩ ⏭

Or, use the shuttle control to scan through video at up to 16 times the playback speed forward or 8 times backward.

```
        x8         Pause        x16
        ↓           ↓            ↓
Scan                                    Scan
backward   [────────●────────]        forward
```

Click and drag the shuttle control knob to the left or the right. The farther from the center, the faster the scan.

The shuttle control knob returns to center when released if pause is selected on the playback control.

## Adding Video to the Clip Manager for Copying

Click {}✕ to clear the start/end times, if they are not blank.

| {→ | ---- -- -- -- --:--:-- | Start time |
| }→ | ---- -- -- -- --:--:-- | End time |

Adjust the time and date displayed below the video to find the point you want to set as the start of the video clip, as described in "Searching and Playing Archived Video".

Click the **Start time** button {→ to set that time as the start of your video clip. If the Start and End times are blank, the End time is automatically set to 1 minute later.

Note: If you click the **End time** button when both times are blank, the Start time is automatically set 1 minute earlier.
| {→ | 2013-03-18 06:20:44 AM | Start time |
| }→ | 2013-03-18 06:21:44 AM | End time |

The duration and estimated size of the clip is displayed below the start and end time.

{--} 01:01:00 (1.2 MB)

Adjust the time and date again to change the point in the video, and click the Start time and/or End time buttons again to edit the clip.

After you have finished setting the start and end time for the video clip, click the **Add to Clip Manager** button to add the selected video to the Clip Manager.

🎞⤓ → ☑ Camera 15
2013-03-18 05:49:57 AM   3.3 MB

The name of the camera, the date and time of the video, and the size of the video all appear in the Clip Manager list.

A **Play** button 🎞▶ and a **Delete** button ✕ appear beside a video clip when you select it in the Clip Manager. Use them to play the clip or remove it from the Clip Manager.

When you select a video clip in the Clip Manager, you can copy it directly to a USB memory stick connected to the recorder's USB port (see "Copying Video").

You can also use the **Snapshot** button 📷 to add a snapshot to the Clip Manager. If you play a snapshot from the Clip Manager, the start and end times are the same.

Including the Evidence Reviewer

You can include the Evidence Reviewer on the USB stick with the copied video. The Evidence Reviewer is a playback tool that lets third-party investigators or law enforcement authorities view video clips.

☑ **ER** Evidence Reviewer   (43.8 MB)

Note: If your administrator has not added the Evidence Reviewer to the recorder, this option is not available.

Viewing Estimated Storage Capacity

The available space on the USB memory stick updates when you save items from the Clip Manager.

🗄↕ = 20 MB   🗄↕ = 5 MB   🎞↕ = 184 KB

Total capacity   Available space   Size of video

If you include the Evidence Reviewer, its size is added to the size of video.

You can select the check box ⬜🗑 to delete the current contents before the selected items are copied.

Copying Video

💾 Click the **Copy** button to write the selected video clips and/or snapshots in the Clip Manager to a USB memory stick.

💾 The Copy button is disabled if there is not enough space for the copy, or no USB stick is connected.

💾✋ When a copy is in progress, a hand appears on the Copy button and you can click it to cancel the copy.

💾✅ If the copy is successful, a disk icon with a green check appears.

💾❗ If the copy fails, a disk icon with a red exclamation point appears.

Next Steps

After you are finished searching for video, you can:

- Change to **Live Mode** 📹 to view live video from the recorder. See "Viewing Live Video" on page 1.
- Log out ⏏ of the graphical user interface.
